The programme is conducted by Fabric and Apparel Science Department with focus on design, production development on home Textiles for different market segments. It aims to highlight digital designing of printed and value addition for textiles. The course will provide inputs on the technical aspects of home textiles and the design process to give a complete understanding in this area. It also elaborates on the concepts of latest trends and forecast.

Department of Fabric and Apparel Science organized a Workshop on 30th January – 3rd April 2021 on “Skill enhancement” the workshop was conducted online mode. Mrs. Seema expert of skill enhancement from Pedilite Co.Pvt. Ltd. has imparted training. This workshop was coordinated by Dr. Amita Walia, Dr. Bhupinder, Dr. Shazia Mehtab, Ms. Divyansha Sharma, Dr. Preeti Kaur, and Ms. Shobha Mandal teaching in the Institute of Home Economics.

The purpose of the workshop is to motivate the students towards skill enhancement on fabric. Various Skill enhancement courses such as Textile Design for B.Sc. Home Sc. (Hons. & Pass) are already running in the department. Students made various articles after each session. Students were enjoyed and learned new techniques of value addition such as tie and dye without dye bath, various embroidery stitches using 3D liners, blue pottery, and minakari work, etc. The most attractive art found by students and teachers was Cutwork using white on white silk. Students made beautiful table runners using cutwork using pearl 3D liner in white silk fabric.

This 30 hours Employability Enhancement Program has been designed to bridge the gap between skill sets desired by the corporate world and the possessed skill sets of students looking out for jobs after their graduation. The course has been specially designed for students to

enhance their corporate readiness. The program enable students to hone their employability skills and jump-start their career in the industry. The program encompassed module on building interpersonal skills, personality enhancement, employability enhancement, job specific skill development and soft skills development (such as communication skills, presentation skills, interview techniques, public speaking). Such activities ensure that the student should possess a right blend of knowledge, skills and attitude to be successful in the placement process. Case studies, group projects, assignments, presentations, interaction with the experts from the industry and real-life simulations were an integral part of the program.

The Department of Human Development and Childhood Studies organized a short-term certificate course on “Understanding Learning Disabilities” from Feb-April 2021. The course was open for all and received an enthusiastic response from people across India and abroad. The first Batch of the course had 29 participants, including college students (from the fields of Home Science, Elementary Education and Psychology), schoolteachers, academic coordinators of schools, university professors, psychologists, counsellors and special educators.

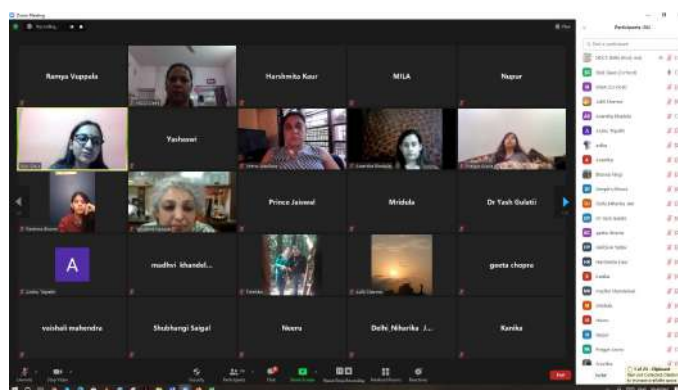

The course spanned across three months, covering very comprehensively, the entire gamut of Learning Disabilities. The presence of highly experienced special educators as resource persons for this course ensured an extremely high standard of expertise and knowledge sharing. The course curriculum and structure was designed and developed by the resource persons in collaboration with faculty of the HDCS department to meet the specific requirements of an online platform. Classes were held every weekend (Friday to Sunday), for 2 hours each day via Google Classroom. Every session was kept interactive to invite responses from the participants and help them understand the field in greater depth. Discussions and deliberations among the participants and the resource persons continued through the week via what's app chats and assignment that helped in consolidating their understanding.

Conclusion:

On an overall the event conducted in an interactive manner and timely completion of the targeted content and high rate of attendance is maintained in the entire span of the short-term course.

The short-term course titled ‘Understanding the Nature and Structure of Human Language’ was organized by Dr Suneeta Mishra for 1st year B.El.Ed. students who have a Linguistics paper in their curriculum. The resource person was India’s eminent sociolinguist Prof Rama Kant Agnihotri who has been a part of many national groups and policy-drafting agencies on education as well as language pedagogy. The course was of 3 weeks duration, starting on 20th April until 14th May 2020. It was organized in online mode on Zoom meetings due to lockdown.

The course aimed to address the following main issues:

- What is the nature of human language?
- How do languages differ from each other and are similar to each other?
- Understanding the socio-political nature of language
- How the structure of language and its various dimensions help understand language policies, politics and socio-cultural aspects of a society

The course equipped students to contribute to language-related debates, collect field data for different languages and analyze linguistic aspects in education. Students were given data and small assignments to work on, apart from the Zoom classes. 23 students attended the full course and were awarded a certificate for the same.

The aim of this 50 hours course was to provide students with the numerous skills needed to manage successful events. Students were introduced to the fundamental aspects of organizing an event from the start, to event operations leading up to successful completion of the event. By learning how to plan, co-ordinate, implement and evaluate events, students learn best industry practices. Case studies were explored from Concerts, Festivals and Outdoor events to Indoor Events such as Private Functions, Corporate events, Conferences, Weddings, and Product Launches. Students had the opportunity to put together their event project/plan which will provide an opportunity to them to ideate the concept, implement the same and carry it to completion.

The 75 hours course offered an opportunity to the students to develop an understanding of design relating to residential spaces with technical skills and aesthetics applied in the realm of form and function. The learning was multifaceted including theoretical, conceptual and project-based learning with options to explore the functional, technical, and planning aspects of interiors, along with the stylistic, aesthetic, and thematic elements of Interior Design. As part of the course, the students learnt the software AutoCAD and used the platform to create various interior designs and 3-D models. They also designed spaces that blended real-world requirements with innovative solutions, to shape holistic spatial experiences. Exposure to practical sites was also given to the students along with classroom sessions.

A short- term course on ‘Campus to Corporate’ was organized by the Department of Development Communication and Extension and Journalism. The course was organized to inculcate and develop soft skills such as effective communication, and public speaking. The course helped students to build strong presentation skills for corporate world. The course consisted of three modules, spread over 30 hours. Module 1 was on CV and Cover Letter Writing. It enabled students to learn the trick of the trade and help them in professional growth. This trained them to make an appealing resume and a cover letter. Module 2 of the course focused on networking sites such as LinkedIn. This helped students to build their professional profile so that they are visible to human resource managers and apply for various work opportunities. Module 3 was based on Professional Communication. Students were trained to speak professionally and with confidence, which are the key requirements of any interview. The course prepared students not only for job interviews and how to speak up their thoughts more confidently.

Number of Students completing the course in the year: 21

Department of Communication and Extension of Institute of Home Economics (IHE), Delhi University aims at providing media and communication knowledge and skills. Hence, the department organized a short-term course in Radio Jockeying. The course was organized with an aim to provide technical know-how of systems and processes and insights into everything that makes a radio station work. The objective of the course was to give an exposure to students to the field of Radio Jockeying. The curriculum covered Production, Communication, Music Programming, Transmission system, Voice Modulation, etc. In this programme students learnt about radio jockeying from the foundational level. The course was conducted by the faculty members of the Department. Some of the resource persons invited for conducting the course are RJ Rahul Makin, Fever FM and Mr. Irfan Khan, All India Radio to name a few. The course was conducted in the audio lab of the department. It is equipped with a fully loaded workstation that consists of a 16-channel analogue audio-mixer, audio-monitor, speakers, microphones, computer, and a two-track sound card. The studio serves as a laboratory to train students in various new-age audio-visuals

The course provided a hands on training to students on scriptwriting, recording and editing for radio. Voice modulation training was provided to students to hone their speaking skills which is essential for a radio jockey but is a skill that a student can apply in all walks of life. The course focussed on how to build content for radio. The students developed various radio programmes and learnt about different radio formats. Radio jingles and radio dramas were developed by the students and were presented at the end of the course.
