NAAC GRADE 'A++' ACCREDITED

Ref. No. IHE/2024-25/Admin/1406.

**GOVERNING BODY FEEDBACK**

GB members would like to congratulate Institute of Home Economics for its great accomplishment in achieving A++ grade in second cycle of NAAC accreditation.

The Institute of Home Economics has established an exemplary feedback mechanism that actively involves diverse stakeholders, including students, faculty, non-teaching staff, parents, alumni, and employees. The Internal Quality Assurance Cell (IQAC) has been instrumental in institutionalizing this process, ensuring regular and systematic collection of stakeholder insights to enhance both academic and administrative performance. Further strengthening of alumni association can be worked on through more frequent engagements.

The IQAC has developed accessible feedback forms on the college website, ensuring streamlined data collection. The gathered feedback is meticulously compiled and analyzed, leading to informed, targeted actions for institutional enhancement. The governing body has lauded this inclusive and comprehensive approach, recognizing its potential to drive meaningful change and shape new avenues for institutional growth.

To promote inclusivity, the IQAC has contributed significantly by installing Braille signage throughout the campus, creating a more accessible educational environment for students with disabilities. Additionally, the cell's efforts in commemorating significant national and international events reflect a dedication to nurturing ethical global citizenship.

The IQAC's efforts to foster a research-oriented culture were also appreciated. Initiatives such as research-focused webinars, seminars, and capacity-building programs have enriched the teaching-learning ecosystem, emphasizing innovation and academic excellence. To foster the use of e-learning resources and platforms hands-on-training workshops can be organised. More interdisciplinary projects can be taken up by faculty and research scholars and more concerted efforts can be made to receive research grants.

The institution's commitment to sustainability is evident through the IQAC's proactive measures, including the elimination of single-use plastics, implementation of waste segregation systems, and promotion of paper recycling practices. Efforts can be made to further promote the usage of bio-degradable and recycled products.

The institution's focus on transforming stakeholder insights into meaningful actions underscores its commitment to fostering a dynamic, inclusive, and sustainable academic environment that supports societal progress and aspirations.

We wish the institution and its faculty, staff and students the very best in their future endeavours and achievements.
