

Syaahi

An initiative for revival of Kasim Karam

A community outreach workshop to disseminate knowledge of making of a fermented natural black dye and possible design effects.

Mixtures of iron scrap and sugar sources on fermenting yield a black colorant. It goes by the names **Kasim Karam**, **Kut**, **Syaahi** in different regions.

This heritage dye used in many traditional textiles like Kalamkari, Bagh, Ajrakh in the yester years is languishing even though the cost and effort in making it is negligible.

Organizing team:

Dr. Charu Gupta

Dr. Sunita Aggarwal

Dr. Preeti Sachdeva

Ms. Aakanksha Agrawal

Department of Fabric and Apparel Science

Institute of Home Economics

An initiative for revival of Kasim Karam
