Department of Biochemistry

Students' Research Projects as per NEP: Year 2025-26

S. No.	Name	Programme	Title of the Project	Dissertation/Academic Project
1	Swati Mishra	Biochemistry	Navigating Emotional and Psychological Challenges: A Qualitative Systematic Review on Women Undergoing Assisted Reproductive Technology	Dissertation
2	Jyoti Dubey	Biochemistry	Impact of Mycotoxin exposure on human health: an umbrella review	Dissertation
3	Naina	Biochemistry	Effect of ochratoxin A and fumonisin on human health: an umbrella review and meta analysis	Dissertation
4	Ishita Shukla	Biochemistry	Navigating Emotional and Psychological Challenges: A Qualitative Systematic Review on Families of women Undergoing Assisted Reproductive Technology	Dissertation
5	Agrimaa Anand	Biochemistry	Computational evaluation of phytochemicals for targeting BACE1 in alzheimer's disease via molecular docking and pharmacokinetic profiling	Dissertation
6	Tanu	Biochemistry	To study the effect of different vegetables on SDS induced intestinal inflammation in drosophila melanogaster (fruit flies)	Dissertation
7	Snidhi	Biochemistry	To study the effect of fruits on SDS induced intestinal inflammation in drosophila melanogaster (fruit flies)	Dissertation
8	Shruti Dabral	Biochemistry	Insilico study of phytochemicals as potential alpha glucosidase inhibitor in diabetes	Dissertation
9	Komal	Biochemistry	Insilico evaluation of phytochemicals as potential inhibitors of Advanced glycation end products in type II Diabetes	Dissertation
